

# *Delivers Fresh!*

---

## **Without the Wet**

---

Préserve™ Perishable Preservation System improves freshness, longevity, and the appearance of cut flowers.

- True dry fog (5-micron, non-wetting)
- Surrounds flowers with proper humidity levels
- Self-sanitization cleans case and extends floral life
- Rolling fog attracts customers
- Quiet operation
- No compressed air needed
- Very low maintenance
- Clean, closed plumbing system exceeds health department requirements

# Préserve Preservation System

Préserve™ is a patented, non-wetting fogging system designed to keep flowers fresher, longer. Using ultra-fine 5-micron droplets, it creates a high-humidity environment that slows transpiration and extends shelf life—all while consuming minimal energy and water. Unlike traditional ultrasonic systems, Préserve™ uses point-of-use nebulization nozzles and a closed-loop design with no standing water, eliminating health risks

associated with open water reservoirs. It exceeds health department standards for safety and is NSF certified, meeting rigorous independent testing for public health and sanitation. For added protection and freshness, the integrated TriOBreeze™ activated oxygen system automatically sanitizes both the system and the case—reducing pathogens and cutting waste.

Préserve emits a hydrating fog of humidity, creating a cooling effect that surrounds flowers, keeping them fresh and vibrant.

Prevents Dehydration	Preserves Appearance and Value	Cuts Down on Labor	Reduces Stress from Refrigeration
Cut flowers lose moisture through the evaporation of water from leaves and petals.	In flower retail, visual appeal is everything.	When flowers stay hydrated less maintenance is needed.	Refrigeration dries out the air, accelerating water loss.
<b>With Préserve:</b> <ul style="list-style-type: none"><li>• Flowers stay hydrated and upright</li><li>• Petals remain vibrant and full</li><li>• Leaves stay green and crisp instead of wilting</li></ul>	<b>With Préserve:</b> <ul style="list-style-type: none"><li>• Maintains bloom integrity</li><li>• Extends display life, reducing waste</li><li>• Supports customer satisfaction and repeat sales</li></ul>	<b>With Préserve:</b> <ul style="list-style-type: none"><li>• There's no need to mist manually</li><li>• Fewer replacements are needed due to early wilting</li><li>• Spend less time managing quality</li></ul>	<b>With Préserve:</b> <ul style="list-style-type: none"><li>• Counteracts dry, refrigerated air</li><li>• Keeps delicate flowers like roses, hydrangeas, and orchids from shriveling</li></ul>
